

Haritz + Röhring offers customized acoustic measurements and consultancy services on site

H+R has been providing noise assessments and mitigation solutions for power generation plants and industrial plants in general.

We have provided comprehensive acoustical engineering services to support clients in permits and approvals for new facility construction or plant expansions or to analyze noise problems and to define counter measures with respect to minimize investments costs.

Acoustic Measurements and Analysis at a Glance:

- Sound Pressure Level measurements carried out in accordance with EN ISO 3740 - 3746
- Sound Intensity Level measurements carried out in accordance with ISO 9614-1 and ISO 9614-2
- Sound Intensity Noise Mapping of Machinery
- Noise Impact Feasibility and Siting studies
- Predictive Acoustic Assessment Reports and noise control design for proposed or planned facilities
- Complaint investigation
- Structure born noise measurement according to DIN 45635
- Noise abatement development for existing facilities
- Locating noise sources in diffuse field environments
